2 OVERVIEW

2.1 PURPOSE

This document contains the Business Blueprint (BBP) for the development of the lawyers app.

In this document all the information regarding the lawyers app will be found including detailed analysis of the application, the development stages, the used technologies, and the quotation for services.

2.2 OBJECTIVES

The objectives of the website will be shown here:

- Automating the connection between clients and lawyers.
- Providing lawyer's services online.
- Providing contracts for download.

2.3 TARGET AUDIENCE

The target audience for this BBP is:

- Owners of the website

The owners of the website represented by the founder and the co-founder of the company

- Development team

The team that will develop the website represented by Abdulla Alqaed.

- Concerned Parties

Any other concerned parties.

3 IMPLEMENTATION OVERVIEW

3.1 SCOPE

The scope is to implement an application that can connect the clients with the users, providing them with access to lawyers over chat and voices calls, in addition to, providing reservations in the available time of the lawyers.

The system must be able to manage the daily transactions and high traffic loads at peak times.

3.2 HIGH LEVEL IMPLEMENTATION

For the lawyers app we will use multiple technologies to achieve the mentioned objectives, one of these technologies is PHP Laravel, this technology will be used for the development of the application using its latest version.

Laravel uses the MVC architecture which is a scalable architecture that helps startup companies into adapting to the changing requirements of the market.

Ionic will be used for the front end development, this environment provides a very fast and scalable way to develop mobile applications.

4 BUSINESS PROCESS

4.1 REQUIREMENTS

The requirements collected from the meetings are as follows:

- The users will be logged in and registered.
- The users will reset their passwords by email.
- The client will register by email.
- The client will receive email confirmation notification.
- The client will choose a lawyer to reserve appointment.
- The client will reserve a spot in a lawyer available time.
- The client will choose type of connection with the lawyer (chat, voice).
- The client will send documents and pictures only to the lawyer over chat.
- The client will view a list of online lawyers.
- The client will choose a category of lawyers.
- The client will voice call the lawyer.
- The client will chat with the lawyer.
- The client will view timings and prices of the lawyer.
- The client will pay online for the lawyer.
- The client will pay using credit or debit card.
- The client will comment and rate a lawyer's profile.
- The client will be able to register with google or apple accounts.
- The lawyer will input his pricing.

- The lawyer will input his available time.
- The lawyer will choose type of document and upload it.
- The lawyer will provide general information about himself.
- The lawyer will provide his own services.
- The lawyer will be notified about appointments.
- The lawyer will be notified about clients wanting to chat/call.
- The lawyer will be notified about latest comments or rating on his profile
- The lawyer will be able to view his financials.
- The admin will be provided an admin panel.
- The admin will provide access to the lawyers.
- The admin will be able to block users.
- The admin will track transactions, comments, rating.
- The admin will add and set the lawyer's profile.
- The admin will reset user's passwords.
- The admin will be provided reports and statistics about the application.
- The system will connect clients with lawyers over chat or voice calls.
- The system will manage available time and reservations appointments.
- The system will provide reports and statistics to all users.

4.2 WEBSITE CONTENTS

The website will contain the following pages:

- Home Page

The client will be able to choose the needed services of the system, the main services are quick consultancy, all lawyers, type of consultancy, legal contracts.

- Contracts Page

A page where every user can access to find an overview about the available contracts draft to download.

- Consultancy Type Page

In this page all types of legal consultancies will be shown to the user to filter the lawyers by their specialty.

- All Lawyers Page

In this page a list of all lawyers will be shown to the client to be able to choose the best lawyer.

- Quick Consultancy Page

In this page only online and available lawyers will be shown to the client.

- Lawyer Profile Page

This page will contain all the needed information about the lawyer, comments and rating will be provided as well, other than that the pricing and the services provided by this lawyer will be shown.

- Account Page

The account page will contain basic user's information, in this page user's can edit their profile and reset password.

- Lawyers Profile Page

Lawyers will be able to set their available time, set their services and pricing from this page.

5 WORK PLAN

5.1 OVERVIEW

This section will contain a detailed information about the work plan, including the stages, dates, and costs.

The work will be divided in stages, where each stage will contain a specific content that will be shown to the end user, after the end-user accepts the content of the stage a payment for that stage will be required to continue to the next stage, the costs and stages will be shown in the next sections.

5.2 TIMELINE

In this section the estimated timeline of the application development will be shown:

Phases	W 1	W 2	W 3	W 4	W 5	W 6	W 7	W 8	W 9	W 10	W 11	W 12	W 13	W 14	W 15	W 16	W 17
Template development																	
Designing																	
Client Front End																	
Lawyers Front End																	
Back End																	
Configuration																	
Client Back End																	
Lawyers Back End																	
Admins Front End																	
Admins Back End																	
Initial Deployment																	
Beta Testing																	
Actual Deployment																	
Testing																	
Maintenance																	

As shown above, these are the stages that will be followed for the development of the lawyer's app, bear in mind that the timeline will start upon agreement of

this document, and that the time allocated for each stage are estimated and might change depending on the resources.

5.3 COSTS

For each stage completed, the fee allocated for that stage must be paid to continue to the next stage.

Below is a chart showing the costs of the stages:

Stages	Cost
Upfront Payment	20%
Initial User Acceptance	30%
First Deployment & Live Testing	25%
After 6 weeks of deployment	25%
Total	8,550 BD

As shown above, these are the costs for the development of the application, note that the upfront payment should be delivered upon accepting the document, while other stages must be paid after the delivery of the stage.

5.4 SERVICES & DEPLOYMENT COSTS

The above costs illustrate the development fees of the application, other fees such as calling services, chat services, emailing gateway, SMS gateway, video call services, Apple and google mobile app deployment services, servers services, and designing or template are not included in the above payment.

Most of these services are paid for annually or monthly by subscription, a recommendation of the best services will be sent to the user alongside the analysis of other services, the user can choose the best service, and he can connect the service with his company then we as developers can implement the solution.
